

## Total HP and VT Connectivity with MiniSoft92

Do you need to connect your PCs or workstations to HP e3000 and/or HP9000 host computers over serial, modem or LAN connections? Are you looking for reliable yet reasonably priced software for this purpose? If the answer is yes, then **MiniSoft92** is the solution.

**MiniSoft92** is the complete HP and VT terminal emulation and connectivity package. The software runs under DOS, Windows or Java and is fully WinSock compliant.

### **Terminal Emulation**

**MiniSoft92** provides accurate emulation of the HP2392A, HP700/92 and VT320 terminals, with full support for both character

and block mode functions. Other features include: up to eight simultaneous sessions through one LAN card, programmable function keys, 132 column display, passthrough printing and keyboard mapping.

### **Network Connectivity**

Windows Sockets have become a *de facto* standard for LAN connectivity. **MiniSoft92** has a WinSock interface for making connections in any Ethernet or Token Ring environment, having been tested with all of the major WinSock compliant TCP/IP stacks.

### **File Transfer**

**MiniSoft92** includes a client/server based network file transfer (NFT) which operates over a WinSock compliant TCP/IP stack. NFT includes an FTP client thus allowing high performance transfers to/from HP e3000 and UNIX systems.

### **Script Language**

**MiniSoft92** features a powerful command language which is ideally suited to automate many repetitive and time consuming tasks.

### **Supported Platforms**

- MS-Windows
- MS-DOS
- Mac (Native OS X)
- Windows CE
