

The Flexible Forms Printing Solution

eFORMz is the most comprehensive enterprise-wide electronic forms solution available for HP and IBM servers.

With **eFORMz** a user can generate all business documents electronically, including invoices, purchase orders, statements, pick tickets, etc.

After designing your form in a favorite word processor, desktop publisher or drawing package, you can use the **eFORMz** Composer to define processing rules that will be applied to the data at run-time.

eFORMz offers multiple output options for the complete document:

- local or networked printer
- fax
- convert to .pdf format and send as e-mail attachment
- archive on local, remote or networked storage device

eFORMz is designed to be integrated with output from virtually any software application and easily handles bar codes, checks, endorsements, multi-part forms, duplex and color printing, and company logos. Pre-designed libraries of forms are available for several packages including Smith Gardner's EuroMACS software.

eFORMz saves money and resources:

- no need to purchase printed forms or letterheads any more
- no forms inventory to maintain - you only need plain paper
- no more discarding mis-aligned forms
- implement changes immediately, with no obsolete forms to discard!

A 30-day evaluation package is available at no cost.

Recommendation: Let our specialists design the forms for your organisation (request our offer).
